

# VHS Vaccine Inclusion Event

---

## Partnership & Collaboration

24 August 2021

Dr Alice Harpur, Speciality Registrar in Public Health, NHS Lothian

[alice.harpur@nhslothian.scot.nhs.uk](mailto:alice.harpur@nhslothian.scot.nhs.uk)

# Multi-agency working

Drawing on a range of **knowledge, expertise, resources** and **relationships**

Example: Partnering with The Edinburgh & Lothian's Health Foundation to develop the microgrant scheme

1

# Recognising diversity

Identify **unique barriers** and **unique facilitators** faced by different populations may face in COVID-19 vaccinations

Example: Multi-partnership collaboration (e.g. MEHIS, Interpretation Services) to make vaccination information available in a range of formats

2

# Flexible delivery models

You had to take **bespoke action** to deliver COVID-19 vaccinations to **overcome barriers** and **maximise facilitators** for different population sub-groups

Example: Vaccinating people experiencing homelessness

3

# Data driven action

Using **real-time data** on vaccine uptake by basic demographics (age, sex, ethnicity, geography) to highlight population sub-groups for whom additional support is required

Example: Using data to inform mobile vaccination unit locations

4

# Equitable resource allocation

For populations who experience the **greatest barriers**, **greater resource** is needed to promote and support vaccine uptake

Examples: partnering with local faith leaders to host community clinics

5

# Embracing the learning cycle

**Drawing on past experience**, so that the next time is more effective, acceptable, efficient, equitable and appropriate

Example: learning from outreach clinic experiences

6

Thank you for listening
