

Data Strategy for Health and Social Care

CONTEXT

- Working vision:
- To ensure high quality data drives the delivery of health and social care services in Scotland.
- To empower the public to access and manage their own health and care data.
- To facilitate greater innovation and research opportunities in health and care data.

CONTEXT

Information Governance

Data Standards
MISSION: to provide a common approach to data standards so that data is interoperable and re-usable.

Sharing Platforms
MISSION: to set out Scottish Government's preferred approach to data platforms for presenting and accessing data sets that are fit for multiple uses.

Talent & Culture
MISSION: to encourage the development of skills to interpret and visualise data in an accessible and citizen friendly way.

Technology
MISSION: to reflect the Digital Health and Care strategy for updating technology and incorporating innovation in the data sphere.
